

Calculate your love with Love Calculator

Time and again, one encounters bouts of insecurity where one seeks succor in instruments that serve as an assurance of love. However unfruitful the search be, one's heart seeks solace however artificial it be.

The Love Calculator is indeed a popular and well known application online. For years and years it has been on the web and any internet user is sure to have encountered it. Not unlike the Hamster Dance forward and the dancing baby forwards, the Love Calculator is one of those annoying web applications that have been forwarded time and again. It is one of those mails that has flooded mailboxes and spread worldwide.

Of course, the application justifies and validates its authenticity with an explanation. Here is what the makers of the application say.

We all know that a name can tell a lot about a person. Names are not randomly chosen: they all have a meaning. Doctor Love knew this so he made another great invention just for the lonely you!

Sometimes you'd like to know if a relationship with someone could work out. Doctor Love has involved himself therefore to design the application. With The Love Calculator you can calculate the probability on a successful relationship between two people. A sure shot way of knowing whether the relationship is going to work for you indeed.

Boredom of course lends one to pass time on the net and in the course, download a few applications like the Love Calculator. Two text boxes, an enter button ... that's the simplicity of it all. The names chosen are entered in the boxes and submitted. A number or rather, a percentage of what is purported to be the love quotient that the former name has for the latter name is displayed. This supposedly is a reflection of romantic plausibility between the two names.

Not at all a bad attempt, one would dismiss in brevity. Closed and narrow though the approach and definition of love is here, there is many a love struck person who has used this. "Dr. Love" holds a rather traditional conception of the idea of love.

One is not of the genius of Dr. love. A love calculator based on a more sophisticated love formula would be interesting indeed. An enhancement indeed. There are many that have of late sprouted over the World Wide Web.

Whether it be a friend who loves you in secret or checking and assuring oneself that a love is faithful and shall remain, here is a chance to put the love to test. Extra details like their date birth, etc might be of handy in refining the figure to a more sophisticated portrayal of their love for you. These of course result in the accurate portrayal of your love, as the website claims. No harm trying, we suppose.
